

Solar Eclipse 2017

What is the 2017 Solar Eclipse? And where can I learn more about it?

At the Putnam Valley Library
30 Oscawana Lake Rd. Putnam Valley, NY 10579
Saturday, August 19th at 2:00 pm

Join the Friends of the Putnam Valley Library, and Science Teacher Fred DePalma, to learn more about what solar and lunar eclipses are, what makes them happen, how often they occur, what effects they have, and how to safely view this one!

Using videos, models, and *science-teachery*, this program is for the whole family.

View the Eclipse
at the Putnam Valley Town Park
156 Oscawana Lake Rd.
Putnam Valley, NY 10579
Monday, August 21st

1:45 pm - 3:30 pm
(Peak Effect at 2:44 pm)

The eclipse actually begins at 1:15 and ends at 4:05 pm

Bring a folding lounge chair and enjoy this once-in-a-lifetime event with your friends and neighbors. Science Teacher Fred DePalma will be on hand to help explain what is happening as it takes place, and to make sure everyone watches the eclipse safely! Refreshments will be available for purchase.

Eclipse Glasses will be available for all participants at each program (while supplies last).

It is not safe to look at the sun, even during an eclipse, without proper eye protection.

YOU CAN PERMANENTLY DAMAGE YOUR EYES!

Shielding your eyes with your hand, wearing sunglasses or other eyewear is not enough!
